2025 Impact Report

A message from our founder

In 2025, The Beautiful Gate Inc. **MASS Program** sponsored by The Florida Breast Cancer Foundation, organized and hosted **28 calendar events** from March thru November 2025 that focused on breast health education and screening throughout Florida. Out of these, three events were cancelled due to low registrations. The organization successfully provided MASS Breast Health Education sessions and onsite 3D screenings at **14 diverse locations**, serving communities from Miami to Lake City. As a result, **231 women benefited from these vital screening services**.

Efforts extended to following up with locations where the mobile unit events were cancelled, ensuring that the 19 individuals who had registered were contacted and offered screening services.

In addition to screenings, The Beautiful Gate Inc. conducted outreach events that delivered breast health education presentations without mobile screenings. These presentations reached **199 participants** at various gatherings and community centers across the state, further amplifying awareness and education efforts.

Through these comprehensive initiatives, The Beautiful Gate Inc. demonstrated significant commitment to expanding breast health awareness, education, and access to screening for women throughout Florida in 2025.
